WHY MANUFACTURERS JOIN

Everything you need to win new overseas and domestic buyers

Product pages buyers can search

Each product gets its own page with price breaks, minimum order, lead time, shipping port and terms. Pages are built to be found on search engines.

Verified Manufacturer badge

Our team reviews your business license and quality certificates. Verified factories are shown first in search and carry the badge on every page and in your catalog.

Designed PDF catalog

One click turns your company profile and every product, price and term into a branded PDF you can send to any buyer.

Leads inbox with status tracking

Quote and sample requests arrive with the buyer's company, destination and quantity. Track each from new to quoted to won.

Duty estimates for buyers

Buyers see the U.S. duty rate for your HS code on the product page, one less question before they order.

Freight on the same network

Get freight bids from verified carriers for your orders without leaving the platform.

HOW IT WORKS
